Thermal Protection

Internal Camera Option with IR Lens

IR sensor & LED capture the images inside the driver's cab, even in very low light conditions.

The rear IR camera option is perfect for commercial vehicle applications.

Provides Front & Rear protection for any vehicle. Particularly useful for vehicles without a rear window that would prevent the use of an internal camera.

Parking Mode (Hardwire Version only)

With the built-in parking mode, the device stays on even after the ignition is off to provide impact and motion detection surveillance when you are away from your car.

Thermal protection sensor triggers the self-protection mechanism to shut down the device under extreme temperatures. Intelligence Auto Exposure - Smart Focusing System - Continues recording during an accident.

The GPS signal receiver keeps track of your vehicle's physical location as well as driving speed while it is on the road. During playback of the videos Google Maps appear on the PC viewer screen along with the GPS information to help you trace your route and speed.
