5Ch Mobile DVR

Our advanced hybrid range of iC360 MDVR (Mobile Digital Video Recorder) equipment are modular and offer a variety of camera type combinations.

Optional 3G and Wi-Fi modules are available for instant reporting and live fleet tracking via the standard GPS module; giving you vehicle location and journey history tracking data.

We provide a choice between 1TB and 2TB hard drives for both units allowing customers to retain footage from all cameras for up to 2 months (depending on usage).

Main Features

- Supports 5ch - 4ch x AHD +1ch IP (12V PoE)
- Modular design for easy maintenance
- Revolutionary anti-vibration technology for 360 degree installation
- Supports 2.5" up to 2TB hard disk, supported SD card for mirror recording of events
- Dual streams for local recording and wireless transmission
- Internal U-blox GPS for location tracking
- Optional internal 3G module for live view and remote data management
- Optional Internal Wi-Fi module for auto downloading
- Built-in inertia sensor (G Sensor) for event Trigger
- 8 x Alarm input Triggers & 2 x Low voltage output triggers

The 5-channel solution offers value for money whilst providing the latest in hybrid mobile multi-camera technology, combining New AHD (Analogue High Definition) plus IP camera technology in a small compact reliable hard drive device.

Recording images in a standard of 720P, our solutions are the latest advancement in High Definition Mobile Technology, providing high quality images from all cameras; which could be the difference between seeing an incident in detail and not, making all the difference to insurance claims, especially 50/50 claims.

CT-HD-MDVR360/5 5Ch Mobile DVR

iC360 5Ch Features;

- 1 x IP Camera Input (720p)
- 4 x AHD Camera Inputs (720P)
- 1 x AHD Monitor Output
- 8 x Input Triggers Sensors
- 2 x Output Triggers
- 1 x GPS Module
- 1 x (Optional) 3G module for live video transfer and instant reporting
- 1 x (Optional) Wi-Fi module for data transfer and instant reporting in Wi-Fi connected areas

Both have built in GPS and accelerometer as standard, providing you with accurate location and speed data and support (optional) 3G & Wi-Fi modules depending on the business requirements.

The trigger inputs allow the MDVR to store valuable video information associated with events such as: reversing, door opening, left and right indication, or fuel cap removal. The output triggers can also help integrate with third party tracking devices.

The operating voltage of our iC360 MDVR ranges from 8v to 36v DC providing power to all the cameras and monitors attached to it, reducing cabling and installation time.

The iC360 range come with a 1 year warranty (subject to correct installation and usage) as standard, which can be extended to 3 years if required.

We also provide a range of Maintenance and Support packages to suit your business needs.

The ROI you gain from our solutions makes them an essential part of your fleet, whether you are trying to improve your drivers' behaviour and in turn reduce fleet costs, or help to reduce your insurance premiums, our iC360 solutions will "Complete your Fleet"
